

App Development — Scope Sheet

Epitome Innovations · RC 2749585

We complete this together, **before any work starts**. It is the single most useful document in an app project: everything inside it is agreed, and everything outside it is a new quote. Attach the signed App Development Policy behind it.

1. Project

Client / business name	
Contact person + phone	
Project name	
Date agreed	
Target launch date	

2. Platform — tick what is included

- ☐ **Website / web app** (runs in a browser — recommended first step)
- ☐ **Android app**
- ☐ **iOS app**
- ☐ **Both Android and iOS** (*note: this doubles the build and doubles the future maintenance surface*)

3. What the app does

One paragraph, in the client's own words:

4. Screens and features included

List every screen. If it is not on this list, it is not included.

#	Screen / feature	What it does
1		

#	Screen / feature	What it does
2		
3		
4		
5		

5. Explicitly NOT included in this quote

Tick and name anything the client might assume is included. Being specific here prevents the argument later.

- ☐ User accounts / login
- ☐ Payment processing
- ☐ Push notifications
- ☐ Admin dashboard
- ☐ Multiple languages
- ☐ Integration with:
- ☐ Other:

6. What you receive at handover

- ☐ The working app
- ☐ Source code repository
- ☐ All account credentials and access
- ☐ Written handover note (hosting, deployment, updates)
- ☐ One handover/training session

7. Accounts and who pays

Item	Owner	Paid by
Apple Developer account	Client	Client
Google Play account	Client	Client
Hosting / database		
Third-party services		

8. Commercials

Currency	☐ NGN ☐ USD ☐ other:
-----------------	---

Build fee	
Payment schedule	e.g. 50% to start, 50% at handover
Defect warranty	30 days from launch (Policy §5)
Maintenance plan	 per month (required for native apps — Policy §6)
Included monthly change allowance	2 hours/month — Policy §6
Additional work rate	 per hour

Clients outside Nigeria are quoted in USD. Governing law, disputes and withholding tax are set out in §13 of the App Development Policy.

9. Timeline and milestones

Milestone	What the client gets	Target date
Design approved	Screens to review	
Build complete	App to test	
Launch	App live	

10. What we need from you

- ☐ Content: text, images, logo, any data the app must show
- ☐ Feedback within **3 working days** at each milestone
- ☐ Developer accounts created (we will help)
- ☐ A single decision-maker to sign off each milestone

Delays in any of these push the launch date by the same amount. We will tell you in writing when a delay happens rather than absorbing it silently.

11. Recurring truth about apps

Both parties confirm they have read §6 and §9 of the App Development Policy:

- a native app **requires** ongoing maintenance to keep working
- if maintenance stops, the app will eventually fall out of the stores, and that is accepted
